

Compare editing Levels 1, 2 and 3

- Here you can see the same paragraph edited at different levels. Compare the level of detail of editing.

Author's original

In the past, many tool type softwares (such as MS Project/Excel) were widely used among projects. Isolated island effect becomes serious but there is not much solution. Traditional ERP system is not designed for the construction/project oriented business.

Level 1 - No mistakes

In the past, many tool type software applications, such as Microsoft Project and Microsoft Excel, were commonly used on projects. The isolated island effect becomes serious and there are few ways to fix this. Traditional Enterprise Resource Planning (ERP) systems are not designed for construction or project oriented businesses.

Level 2 - Easy for a native speaker of English to read

In the past, many tool type software applications, such as Microsoft Project and Microsoft Excel, were commonly used on projects. The isolated island effect became serious as a result. There are few effective remedies. Traditional Enterprise Resource Systems (ERP) are not designed for construction or project oriented businesses.

Level 3 - Written by a very good writer who is an expert in their field

Tool type software applications, such as Microsoft Project and Microsoft Excel, have been and continue to be commonly used on projects, with the isolated island effect being an unfortunate and not easily remedied result. Traditional Enterprise Resource Systems (ERP) are not specifically designed for construction or project-oriented businesses.
